

Why is it important to have the correct Polishing Kit?

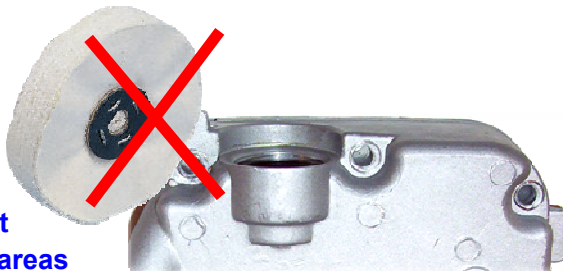

Polishing mop too large to fit into corners

Correct size mop to polish a round corner

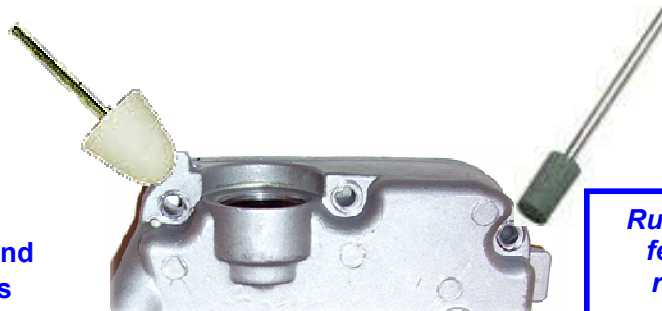

...Felt bobs and cones can also be used...

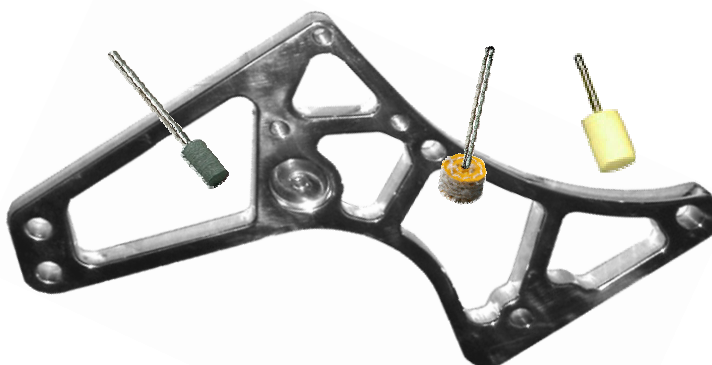

Sometimes mops do not reach into all the tricky areas

Polishing mops do not polish recesses or counterbores

ABC kits contain felts and rubber abrasive points

Rubber abrasive points and felts are used to polish a recess and counterbore

The correct way to polish around the inner openings of this bracket is to use small dolly mops, abrasive rubber points and felts

A combination of mops, abrasive points and felts are necessary to achieve the best results
